JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject Index of Volume 476

Acetophenones
Thermodynamic and kinetic basicities of the carbon and oxygen ends of enolates. Their role in the reductive cleavage electrochemistry of α-substituted acetophenones, 81
Adsorbed species
Surface diffusion and the spillover of H-adatoms and oxygen-containing surface species on the surface of carbon black and Pt/C porous electrodes, 101
Adsorption
Electric field effects on CO and NO adsorption at the Pt(111) surface, 64
Square wave stripping voltammetry of Cd–oxine complexes; surface redox reactions, 165
Anion electroreduction
Effect of cation adsorption on the kinetics of anion electroreduction: Part I. Effect of the adsorption of inorganic cations in small concentrations on the kinetics of anion electroreduction with different elementary steps of discharge, 26
Effect of cation adsorption on the kinetics of anion electroreduction: Part II. Effect of the adsorption of organic cations in small concentrations on the kinetics of anion electroreduction, 37

Bithiophene
Polymer chain encapsulation followed by a quartz microbalance during electropolymerization of bithiophene-β;-cyclodextrin host-guest compounds in aqueous solution, 1

Cadmium
Square wave stripping voltammetry of Cd–oxine complexes; surface redox reactions, 165
Carbon
Graphite photoelectrochemistry: 2. Photoelectrochemical studies of highly oriented pyrolitic graphite, 118
Carbon black
Surface diffusion and the spillover of H-adatoms and oxygen-containing surface species on the surface of carbon black and Pt/C porous electrodes, 101
Carbon electrodes
Reduction and oxidation of peptide nucleic acid and DNA at mercury and carbon electrodes, 71
Charge transport
Temperature dependence of physical displacement and charge hopping in a polymer membrane incorporating a trinuclear ruthenium complex, 159
Cobalt
Anodic electrodeposition of conducting cobalt oxyhydroxide films on a gold surface. XPS study and electrochemical behaviour in neutral and alkaline solution, 54
Cyclic voltammetry
Anodic electrodeposition of conducting cobalt oxyhydroxide films on a gold surface. XPS study and electrochemical behaviour in neutral and alkaline solution, 54
Electrochemical behavior of a *Cypridina* luciferin analogue in acetonitrile solutions in the presence of proton acceptors, 46
Mechanism of the electrochemical reduction of sulfur dioxide in non-aqueous solvents, 15
Reduction and oxidation of peptide nucleic acid and DNA at mercury and carbon electrodes, 71
Cyclodextrin
Polymer chain encapsulation followed by a quartz microbalance during electropolymerization of bithiophene-β-cyclodextrin host-guest compounds in aqueous solution, 1
Cypridina luciferin analogues
Electrochemical behavior of a *Cypridina* luciferin analogue in acetonitrile solutions in the presence of proton acceptors, 46

D-glucose
Platinum–palladium loaded polypyrrole film electrodes for the electrooxidation of D-glucose in neutral media, 171
Diffusion constant
Spectroelectrochemical investigations on the reduction of thin films of hexadecafluorophthalocyaninatozinc (F_{16}PcZn), 148
Digisim®
Mechanism of the electrochemical reduction of sulfur dioxide in non-aqueous solvents, 15
Dimerization
Electrochemical behavior of a *Cypridina* luciferin analogue in acetonitrile solutions in the presence of proton acceptors, 46
Distance-dependence of electron transfer
Voltammetric determination of electron transfer kinetic parameters in hydroquinone-terminated self-assembled monolayers on gold, 177
DNA oligomers
Reduction and oxidation of peptide nucleic acid and DNA at mercury and carbon electrodes, 71
Double potential-step chronoamperometry
Electrochemical behavior of a *Cypridina* luciferin analogue in acetonitrile solutions in the presence of proton acceptors, 46
Dual integral equation
Steady-state currents at inlaid and recessed microdisc electrodes for first-order EC′ reactions, 132

EC′ mechanism
Steady-state currents at inlaid and recessed microdisc electrodes for first-order EC′ reactions, 132
Electric double layer
Effect of cation adsorption on the kinetics of anion electroreduction: Part I. Effect of the adsorption of inorganic cations in small concentrations on the kinetics of anion electroreduction with different elementary steps of discharge, 26
Effect of cation adsorption on the kinetics of anion electroreduction: Part II. Effect of the adsorption of organic cations in small concentrations on the kinetics of anion electroreduction, 37
Electric field effects
Electric field effects on CO and NO adsorption at the Pt(111) surface, 64

PII: S0022-0728(99)00417-9

Electrocatalysis
Electrochemical and electrocatalytic properties of tetra-iron substituted sandwich-type pentadecatungstodiphosphate heteropolyanions, 85
Electrochromism
Spectroelectrochemical investigations on the reduction of thin films of hexadecafluorophthalocyaninatozinc (F_{16}PcZn), 148
Electrodeposition
Anodic electrodeposition of conducting cobalt oxyhydroxide films on a gold surface. XPS study and electrochemical behaviour in neutral and alkaline solution, 54
Electronic properties
Graphite photoelectrochemistry: 2. Photoelectrochemical studies of highly oriented pyrolitic graphite, 118
Electron transfer kinetic parameter
Voltammetric determination of electron transfer kinetic parameters in hydroquinone-terminated self-assembled monolayers on gold, 177
Electron tunneling constant
Voltammetric determination of electron transfer kinetic parameters in hydroquinone-terminated self-assembled monolayers on gold, 177
Electropolymerization
Polymer chain encapsulation followed by a quartz microbalance during electropolymerization of bithiophene-β-cyclodextrin host-guest compounds in aqueous solution, 1
Encapsulation
Polymer chain encapsulation followed by a quartz microbalance during electropolymerization of bithiophene-β-cyclodextrin host-guest compounds in aqueous solution, 1

Film thickness
Effects of polymer thickness on the potentiometric pH responses of polypyrrole modified glassy carbon electrodes, 109
Finite element method
Steady-state currents at inlaid and recessed microdisc electrodes for first-order EC′ reactions, 132

Gold electrode
Anodic electrodeposition of conducting cobalt oxyhydroxide films on a gold surface. XPS study and electrochemical behaviour in neutral and alkaline solution, 54
Graphite
Graphite photoelectrochemistry: 2. Photoelectrochemical studies of highly oriented pyrolitic graphite, 118

Homogeneous reaction
Steady-state currents at inlaid and recessed microdisc electrodes for first-order EC′ reactions, 132
HOPG
Graphite photoelectrochemistry: 2. Photoelectrochemical studies of highly oriented pyrolitic graphite, 118
H_2O_2 reduction
Electrochemical and electrocatalytic properties of tetra-iron substituted sandwich-type pentadecatungstodiphosphate heteropolyanions, 85
Host–guest inclusion compounds
Polymer chain encapsulation followed by a quartz microbalance during electropolymerization of bithiophene-β-cyclodextrin host-guest compounds in aqueous solution, 1
Hot electrons
Graphite photoelectrochemistry: 2. Photoelectrochemical studies of highly oriented pyrolitic graphite, 118
Hot holes
Graphite photoelectrochemistry: 2. Photoelectrochemical studies of highly oriented pyrolitic graphite, 118

Hydrodynamic voltammetry
Electrochemical behavior of a *Cypridina* luciferin analogue in acetonitrile solutions in the presence of proton acceptors, 46
Hydroquinone-terminated self-assembled monolayer
Voltammetric determination of electron transfer kinetic parameters in hydroquinone-terminated self-assembled monolayers on gold, 177
Hydroxylation
Electrochemical behavior of a *Cypridina* luciferin analogue in acetonitrile solutions in the presence of proton acceptors, 46

Ion intercalation
Spectroelectrochemical investigations on the reduction of thin films of hexadecafluorophthalocyaninatozinc (F_{16}PcZn), 148

Jacketed cell
A jacketed cell for infrared spectroelectrochemistry at constant above ambient temperatures, 95

Kinetics
Thermodynamic and kinetic basicities of the carbon and oxygen ends of enolates. Their role in the reductive cleavage electrochemistry of α-substituted acetophenones, 81

Mercury electrodes
Reduction and oxidation of peptide nucleic acid and DNA at mercury and carbon electrodes, 71
Microdisc electrode
Steady-state currents at inlaid and recessed microdisc electrodes for first-order EC′ reactions, 132

Nafion® membrane
Temperature dependence of physical displacement and charge hopping in a polymer membrane incorporating a trinuclear ruthenium complex, 159
Non-aqueous solvent
Mechanism of the electrochemical reduction of sulfur dioxide in non-aqueous solvents, 15
NO_2^- reduction
Electrochemical and electrocatalytic properties of tetra-iron substituted sandwich-type pentadecatungstodiphosphate heteropolyanions, 85

Oxine
Square wave stripping voltammetry of Cd–oxine complexes; surface redox reactions, 165

Photoelectrochemistry
Graphite photoelectrochemistry: 2. Photoelectrochemical studies of highly oriented pyrolitic graphite, 118
pH Response
Effects of polymer thickness on the potentiometric pH responses of polypyrrole modified glassy carbon electrodes, 109
Phthalocyanine
Spectroelectrochemical investigations on the reduction of thin films of hexadecafluorophthalocyaninatozinc (F_{16}PcZn), 148
Platinum/palladium particles
Platinum–palladium loaded polypyrrole film electrodes for the electrooxidation of D-glucose in neutral media, 171
PNA oligomers
Reduction and oxidation of peptide nucleic acid and DNA at mercury and carbon electrodes, 71
Polybithiophene
Polymer chain encapsulation followed by a quartz microbalance during electropolymerization of bithiophene-β-cyclodextrin host-guest compounds in aqueous solution, 1

Polymer-coated electrodes
Temperature dependence of physical displacement and charge hopping in a polymer membrane incorporating a trinuclear ruthenium complex, 159
Polymer electrodes
Platinum–palladium loaded polypyrrole film electrodes for the electrooxidation of D-glucose in neutral media, 171
Polypyrrole
Effects of polymer thickness on the potentiometric pH responses of polypyrrole modified glassy carbon electrodes, 109
Platinum–palladium loaded polypyrrole film electrodes for the electrooxidation of D-glucose in neutral media, 171
ψ_1 Potential
Effect of cation adsorption on the kinetics of anion electroreduction: Part I. Effect of the adsorption of inorganic cations in small concentrations on the kinetics of anion electroreduction with different elementary steps of discharge, 26
Effect of cation adsorption on the kinetics of anion electroreduction: Part II. Effect of the adsorption of organic cations in small concentrations on the kinetics of anion electroreduction, 37
Potential-step chronocoulospectrometry
Temperature dependence of physical displacement and charge hopping in a polymer membrane incorporating a trinuclear ruthenium complex, 159
Potentiometry
Effects of polymer thickness on the potentiometric pH responses of polypyrrole modified glassy carbon electrodes, 109
Powder | Nafion® interface
Surface diffusion and the spillover of H-adatoms and oxygen-containing surface species on the surface of carbon black and Pt/C porous electrodes, 101
Pt/C catalyst
Surface diffusion and the spillover of H-adatoms and oxygen-containing surface species on the surface of carbon black and Pt/C porous electrodes, 101
Pt(111) surface
Electric field effects on CO and NO adsorption at the Pt(111) surface, 64

Quartz crystal microbalance
Polymer chain encapsulation followed by a quartz microbalance during electropolymerization of bithiophene-β-cyclodextrin host-guest compounds in aqueous solution, 1

Reaction/diffusion
Steady-state currents at inlaid and recessed microdisc electrodes for first-order EC′ reactions, 132
Redox mechanism
Mechanism of the electrochemical reduction of sulfur dioxide in non-aqueous solvents, 15
Redox reactions
Electrochemical behavior of a *Cypridina* luciferin analogue in acetonitrile solutions in the presence of proton acceptors, 46
Reduction
Mechanism of the electrochemical reduction of sulfur dioxide in non-aqueous solvents, 15
Reductive cleavage
Thermodynamic and kinetic basicities of the carbon and oxygen ends of enolates. Their role in the reductive cleavage electrochemistry of α-substituted acetophenones, 81
Ruthenium complex
Temperature dependence of physical displacement and charge hopping in a polymer membrane incorporating a trinuclear ruthenium complex, 159

Spectroelectrochemistry
A jacketed cell for infrared spectroelectrochemistry at constant above ambient temperatures, 95
Spillover
Surface diffusion and the spillover of H-adatoms and oxygen-containing surface species on the surface of carbon black and Pt/C porous electrodes, 101
Square wave voltammetry
Reduction and oxidation of peptide nucleic acid and DNA at mercury and carbon electrodes, 71
Square wave stripping voltammetry of Cd–oxine complexes; surface redox reactions, 165
Steady-state
Steady-state currents at inlaid and recessed microdisc electrodes for first-order EC′ reactions, 132
Sulfur dioxide
Mechanism of the electrochemical reduction of sulfur dioxide in non-aqueous solvents, 15
Surface conductivity
Surface diffusion and the spillover of H-adatoms and oxygen-containing surface species on the surface of carbon black and Pt/C porous electrodes, 101

Temperature
A jacketed cell for infrared spectroelectrochemistry at constant above ambient temperatures, 95
Tetra-iron substituted sandwich-type heteropolytungstate
Electrochemical and electrocatalytic properties of tetra-iron substituted sandwich-type pentadecatungstodiphosphate heteropolyanions, 85
Thermodynamic analysis
Temperature dependence of physical displacement and charge hopping in a polymer membrane incorporating a trinuclear ruthenium complex, 159
Thin film
Spectroelectrochemical investigations on the reduction of thin films of hexadecafluorophthalocyaninatozinc ($F_{16}PcZn$), 148

UV–vis spectroscopy
Spectroelectrochemical investigations on the reduction of thin films of hexadecafluorophthalocyaninatozinc ($F_{16}PcZn$), 148

Voltammetry
Electrochemical and electrocatalytic properties of tetra-iron substituted sandwich-type pentadecatungstodiphosphate heteropolyanions, 85

X-ray photoelectron spectroscopy
Anodic electrodeposition of conducting cobalt oxyhydroxide films on a gold surface. XPS study and electrochemical behaviour in neutral and alkaline solution, 54
